Product identification system

Patent number: GB2325550
Publication date: 1998-11-25
Inventor: DAINES PAUL; ASHER STEPHEN PAUL ALASDAIR
Applicant: DAINES PAUL (GB)
Classification:
- International: G06K7/10; G06K19/06; G06K7/10; G06K19/06; (IPC1-7): G06K17/00
- european: G06K7/10E
Application number: GB19980004444 19980304
Priority number(s): GB19970007279 19970410

[Report a data error](#)**Abstract of GB2325550**

A product identification system includes a bar-code scanner (10) having a memory and comparison means. Information is entered in the memory concerning the allergen contents of a range of food or the contents of a medication. This information is interrelated to the bar-code data on the container or packaging of foodstuffs or medication. The scanner (10) is also provided with information taken from a card (12) concerning the sensitivities of a user so that, when the scanner (10) is directed at the code of an item of food or medication, the comparison means is operated to provide a signal if it is allergic to that item of food or medication.
